JARNAIL SINGH
Chief Executive Officer

D.O. No.: 1/11/PAC-2013
Dated: 11th October, 2013

Dear Shri E.K. Bharat Bhushan

As we are all aware, the quality of project appraisal is the main determinant of success of a project. The World Bank reports have brought out that the poorly appraised projects or programmes have seven times more probability of failure within three years of their implementation as compared to well appraised projects. In addition to screening out unviable projects and ranking projects, proper project appraisal helps in expediting the financial closure and timely completion of projects. Risk analysis helps in better understanding of the risks and evaluation of options available for managing each risk. **The quantitative risk analysis also improves decision making in the marginal projects.**

The 'Project Appraisal Consultants' is a new venture to train civil servants and professionals in Project Appraisal, Risk Analysis and Risk Management. As an initiative towards this direction, a one week programme has been designed on 'Project Appraisal and Introduction to Risk Analysis and Risk Management'. A brochure containing the details about the programme is enclosed.

The programmes will be conducted in February and March 2014 as given below.

inculcate pl

First programme	10 th to 14 th February 2014
Second Programme	03 rd to 07 th March 2014
Venue of both the programmes	Lecture Room 1 (Annexe), India International Centre 40 Max Muller Marg New Delhi 110003

2/18.10.13

3. This may perhaps be the **only programme of its kind solely on Project Appraisal**. The programme will be taught with case exercises by faculty who has taught this programme in top class universities such as Harvard University and Duke University. The participants will be taught all aspects of financial appraisal, differences between financial and economic appraisals and introduced to quantitative risk analysis and risk management. Monte Carlo simulation method would be used for project-return [NPV, IRR, BC Ratio] simulation by Crystal ball software.

S (PLARJ)

4. I am definite that the State Government departments and Organizations would find this programme very useful and **many times more worth its cost**. If any person or persons are to be nominated for the one week training, it can be done by following the procedure prescribed in the attached brochure.

9/19.10.13 JS

Regards,

Yours Sincerely,

Jarnail Singh
